PROVISION OF WORKS EXECUTION CERTIFICATE

It is hereby certified that Mr. Efstathios Servos, Mechanical Engineer, has successfully completed during the years 1992-1993 the following projects:

- a) Replacement of converters of the A' and B' body of the Boiler of the 9th Unit in the Agios Georgios Power Station (AGPS).

Contract No 54/92 AGPS

The project included the dismantlement of the old and the installation of 28 new converters, the replacement of sections of the steam lines and dismantling and construction of thermal insulations.

Welding of the superheated (526° C and 160 atu pressure) and reheated (478° C and 30 atu pressure) steam lines was radiographed at a percentage of 100%, followed by PWHT.

The material of the steam lines was 13 CR Mo 4,4.

The final cost of the project, excluding the steam lines materials, amounted to 37,704,453 drachmas, VAT included.

- b) Replacement of a section of the thermal insulation in the 9th Unit of the AGPS.

Contract No 66/93 AGPS

The final cost of the project amounted to 3,397,220 drachmas, VAT included.
